

AO Flow – Structured Test Case Document

Sign-Up Flow

Test Case ID: AO-SU-01

Objective: Verify new user sign-up process.

Steps:

- Enter username (@banane)
- Enter password
- Enter email address

Expected Results:

- Account is created successfully with valid inputs.
- If existing username/email is entered → system should redirect to sign-in page or show error.

Login Flow

Test Case ID: AO-LO-01

Objective: Validate login functionality.

Steps:

- Enter incorrect username
- Enter incorrect password
- Test “Forgot Username” link
- Test “Forgot Password” link

Expected Results:

- Incorrect credentials → error message displayed.
- Forgot Username/Password → recovery workflow triggered.

New Request Creation

Test Case ID: AO-NR-01

Objective: Verify request creation process.

Steps:

- • Add new request
- • Select aircraft (A/C)
- • Ensure fields auto-populate
- • Select ICAO using airport name/ICAO code
- • Enter ETA + ETD date/time in correct format
- • Upload file (test incorrect format/size)
- • Submit request

Expected Results:

- • Request created successfully with valid inputs.
- • Invalid file format/size → error message.
- • If MRO does not have A/C or airport coverage → request not created.
- • If MRO has A/C and covers airport → request created.

Request Management

Test Case ID: AO-RM-01

Objective: Validate request lifecycle actions.

Steps:

- • View request
- • Edit request
- • Delete request
- • Open/check answer

Expected Results:

- • All actions perform correctly.
- • Attachments open successfully.
- • Offers can be accepted/rejected.
- • MRO profile view accessible.
- • Accepting MRO quote without PO → error shown.

Purchase Order (PO) Handling

Test Case ID: AO-PO-01

Objective: Verify PO upload and validation.

Steps:

- • Upload PO and tick confirmation box
- • Do not upload PO but tick box
- • Upload PO without ticking box

Expected Results:

- • System enforces PO upload + confirmation.
 - • Error shown if PO missing or box unchecked.
 - • Notifications sent to MRO when PO uploaded.
-

MRO Application Handling

Test Case ID: AO-MRO-01

Objective: Validate MRO application workflow.

Steps:

- • View request details
- • Select “Answered”
- • Handle multiple applications (view, contact, accept, update, delete)

Expected Results:

- • Multiple applications displayed correctly.
 - • Requests list ordered by newest first.
 - • Notifications shown for acceptance/work started.
-

Work Started

Test Case ID: AO-WS-01

Objective: Verify job status updates.

Steps:

- • AO views job status and Reg details
- • AO updates request
- • AO messages MRO

Expected Results:

- • Status updates visible to AO.
 - • MRO side correctly shows “Work Started.”
-

CRS Submission

Test Case ID: AO-CRS-01

Objective: Validate CRS workflow.

Steps:

- • AO receives CRS notification
- • AO downloads CRS
- • AO accepts/rejects CRS
- • AO requests CRS change

Expected Results:

- • CRS notifications redirect to correct job.
 - • AO can accept/reject CRS.
 - • Feedback submission works.
-

Dispute Management

Test Case ID: AO-DIS-01

Objective: Verify dispute handling.

Steps:

- • AO views list of disputes
- • AO opens old requests
- • AO views/downloads PO
- • AO opens dispute
- • AO deletes dispute
- • AO closes dispute

Expected Results:

- • Dispute notifications correctly linked to request ID.
 - • No 404 errors when viewing disputes.
 - • Admin dispute responses correctly identified.
-

Profile Update – All Fields

Test Case ID: AO-PRO-01

Objective: Verify AO can update and save all profile fields successfully.

Steps:

- • Navigate to My Profile > Edit
- • Update First Name, Last Name, Contact Number, Username, Email, Company Name, Country, City, Address, Zip Code
- • Click Save/Update
- • Refresh page and re-open profile

Expected Results:

- • Changes persist after save and page refresh
 - • Validation messages shown for invalid inputs
 - • No backend or UI errors
-

Password Update

Test Case ID: AO-PWD-01

Objective: Verify password can be changed using Old, New, Confirm fields.

Steps:

- • Navigate to My Profile > Change Password
- • Enter Old Password
- • Enter New Password (meets complexity)
- • Confirm New Password
- • Click Update Now
- • Log out and log in with the new password

Expected Results:

- • System accepts password change
 - • Login succeeds with new password
 - • Old password no longer works
-

Aircraft Management – Add/View/Update/Delete

Test Case ID: AO-ACFT-01

Objective: Verify AO can manage aircraft records (add, view, update, delete).

Steps:

- • Navigate to Aircraft section
- • Add new aircraft with mandatory fields
- • View aircraft details
- • Update aircraft details (ensure original data pre-fills)
- • Delete aircraft and confirm removal

Expected Results:

- • Aircraft added successfully with unique ID
 - • Details view shows correct data
 - • Update persists changes without altering ID
 - • Deletion removes aircraft from list
-

Notification Preferences

Test Case ID: AO-NOT-01

Objective: Verify AO can change notification preferences and they persist.

Steps:

- • Navigate to Notifications
- • Toggle preferences (Email, Platform, MRO replies, Appointment Requests, PO Acceptance, Maintenance proposals, Work starting, Report submissions)
- • Click Save
- • Refresh and verify changes

Expected Results:

- • All changes persist after save
 - • Notifications delivered according to preferences
-

Messages – Ordering & Visibility

Test Case ID: AO-MSG-01

Objective: Verify messages are sorted New → Old and only show after contact.

Steps:

- • Navigate to Messages
- • Check ordering of threads
- • Send/receive a new message and verify it appears at the top
- • Ensure threads only appear after contact/activity

Expected Results:

- • Messages sorted from newest to oldest
 - • No empty threads displayed
 - • New activity bubbles to the top
-
