

Test Scope

This test focused on validating the AO-to-MRO workflow on the staging environment of coreaviationnetwork.com. The following areas were covered:

Request creation and submission from AO1301

MRO bidding and response via CHMRO1301

Workflow transitions and field validations

Bug tracking and missing field identification for the PDF report

Bugs and Missing Fields

The following issues were identified during testing:

Missing 'Aircraft Type' field in the generated PDF report

Incorrect date format in 'Requested Completion Date'

MRO bid amount not displayed in summary view

Disputes section not accessible post-award

PDF report does not include AO contact information

Workflow status not updated after MRO acceptance
